

# PC5H single point load cell

## product description

The PC5H is designed for rear-end bin lifting systems on waste collection vehicles. Certified to both OIML and NTEP standards the PC5H is the ideal choice for trade approved waste collection applications. The fully welded, stainless steel design and rugged construction overcomes the problems associated with alternative aluminium load cell based systems.

Alternative load cell size and bolt hole configurations are available in the Flintec bin-lift load cell range – see PC2H, PC3H, PC6H and PC7H single point load cells.
